Documoto Cloud Library

Gain a competitive edge by sharing critical technical documentation with your network!

Share content using our Cloud Library Solution. Documoto's Cloud Library provides a browser-based interface where users can find and view the OEM technical information they need. This distributed cloud computing technology enables easy information storage and retrieval for everyone in your organization. Maintaining a central repository of product-related content gives you a competitive edge, from customer support to field service to regulatory compliance.

Cloud Library's Asset Sharing Capabilities

- Share Updated Documents Your team can store diverse formats into Documoto's central repository. This includes files (price lists, certifications, reports, catalogs, manuals, etc.), images (flyers, product photos, documentation images, etc.), and videos (demonstration videos, training videos, repair procedure videos, etc.).
- Grant Access to Your Team Documoto grants you full control over the Cloud Library. You can restrict access to certain users and specify the content that authorized users can see.
- **Reduce Extraneous Communication** Cut out the need for a long email exchange requesting specific documents. Grant users access to the repository, so they can retrieve the file they need, whenever they need it.

- Share with no Friction The Cloud Library allows browser-based, 24/7 access to authorized users. It has an intuitive visual interface that's easy to use. Searching is a breeze — the repository has a robust search feature with tags, filters, and metadata.
- Support Business Endeavors By storing important files, the Cloud Library supports almost all units within an organization. It empowers asset managers, maintenance teams, sales teams, quality control, and more. It can serve as an asset management tool, after-sales support tool, and even a knowledge bank, all rolled into one.

What Are the key Benefits of using Documoto Cloud Library?

Documoto's powerful capabilities meet the unique needs of manufacturers

Documoto is flexible and adaptable to accommodate the needs of manufacturers, asset managers, support organizations, service and maintenance, quality control and other business units.

The Cloud Library functions as a customer support portal, knowledge base, or asset management tool.

Drastically reduce phone and email support by providing accurate product data online.

Relate content to specific parts and machines down to the serial number level, from regulatory certifications, inspection notices and change orders to warranties, work instructions and repair videos.

Documoto stores and displays common file types and formats: PDF, video, images, and more.

Easy, rapid implementation lets you add content quickly and begin seeing benefits almost immediately.

Powerful search functions include full-text PDF queries, with advanced tagging and metadata capabilities for custom filtering and fast search results.

Easily upgrade to Documoto Storefront to enable online ordering from interactive parts catalogs.

Control access by user or organization, share only the information you want users to see.

Documoto Cloud Library is a cloud-based SaaS application that is available with several licensing options to match your business requirements. Only pay for what you need—Documoto gives you the ability to scale as your online business grows.
