WIDGETS

Embed Documoto content directly into your own websites, portals, and applications

LEARN MORE

EMBED WITH DOCUMOTO.

WHAT ARE DOCUMOTO WIDGETS?

Documoto's low-code widgets enable users to access content directly from Documoto, allowing for easy embedding on websites, dealer sites, and third-party systems like rental counters and user portals.

WHAT ARE THE BENEFITS OF WIDGETS?

Improve customer self-service, reduce support costs, and enhance the overall user experience.

POTENTIAL USE CASES FOR WIDGETS

Embed Documoto in your eCommerce, Dealer Portal, Inspection Tool, Mobile Apps, and more!

LIBRARY WIDGET

Provides full access to the Documoto Library

MEDIA WIDGET

Displays a specified Media from the Documoto Library

PAGE WIDGET

Displays a specified Page from the Documoto Library

PRODUCT PAGE WIDGET

Displays a specified Product Page from the Documoto Library

Let users access your content in the places where they will use it

HEADLESS API

Create a customer experience that fits your business instead of adapting your business to your software.

LEARN MORE

> DEVELOP WITH DOCUMOTO.

> WHAT IS HEADLESS?

Headless separates the presentation layer from the Documoto library. You build the interface your dealers and technicians interact with. Documoto handles everything behind it.

> WHAT ARE THE BENEFITS OF HEADLESS?

Purpose-built to bridge the gap between front-end applications and Documoto's robust back-end repository, these endpoints prioritize efficiency and data security.

> HOW DO THE ENDPOINTS WORK?

There's an API for anything you want to search, filter, or view in the Documoto library - within your own custom interface.

LIBRARY ENDPOINTS

Seamlessly access, manage fetch and leverage content within any other application or system.

SKIP THE INFRASTRUCTURE

Documoto provides the secure, enterprise-ready infrastructure behind your front-end application, so your team can focus on delivering features, not maintaining systems.

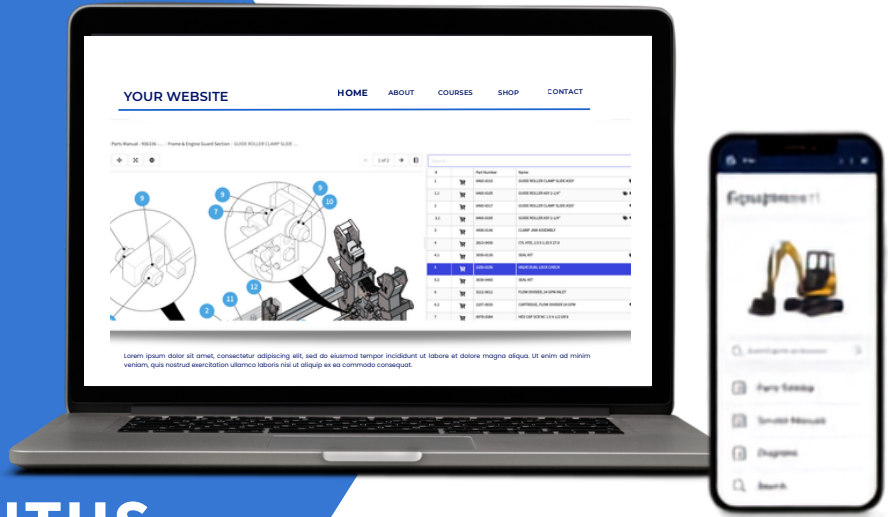

LIBRARY ENDPOINTS

Seamlessly access and manage fetch and leverage content within any other application or system.

> Let users access your content in the places where they will use it
